F FLOORING

FULL-PROCESS

1

What is full-process?

We select each board to perfectly match the end product. It is going through the whole production process from double planner to final touch handmade by skillful carpenter.
Nail holes, surface crack, end split are all either glued or plugged.

Processing

2

Pick the thickness

18, 15 or 12mm T&G

Fine for ground floor application where boards are fixed to sub-floor or laid on battens

18, 15mm Shiplap

Fine for ground floor application where boards are fixed to sub-floor

3

Pick the width

Uniform

All boards are same width, easier for laying

Varied

Boards are a mixture of fixed widths, providing more variety; although you have to match ends when laying

4

Pick the length

Random

Boards are between 60 to 360 cm

Incremental

We cut the boards to match the center spaces between your joists

Extra cost

Fixed

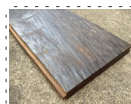

We cut the boards to specific lengths requested by you

Extra cost

5

Choose a texture

Ulin original rustic

Ulin classic smooth

6

Want to make it even better?

- Lay on our reclaimed joists or battens
Find more info in our Lumber section
- Use our high quality metal fittings

- Finish with our non-toxic wood finishes
- Use qualified flooring installers
Ask us who we recommend

Kaltimber's solid hardwood flooring comes in a range of species & sizes.

We have put together this guide to help you decide

SEMI-PROCESS

1

What is semi-process?

We take raw boards on top of the stock pile and process it such as square edges (see below) and in addition it goes through our molding to put a profile on. Nail holes, surface cracks and end split are left untouched. Boards are always power wash with water to clean dirt and mud.

Processing
